LED indicator light status

Pairing

- Red and blue lights alternately flash and voice prompt “Pairing” is given.

Pairing completed

- Blue light flashes 5 times and voice prompt “Pairing completed” is given.

Standby

- Blue light flashes 2 times within 10 seconds.

Incoming call

- Blue light flashes 2 times within 2 seconds.

Pairing and connecting

Pairing with one mobile phone:

1. Long press the multifunction button for 5 seconds at off mode, and voice prompts “Startup”, “Voice alarm for power consumption” and “Pairing” are given while the blue light keeps illuminating.
2. Activate the Bluetooth on mobile phone, search and add new Bluetooth device from menu.
3. Select “Macaw T1000” from Bluetooth device list on mobile phone to connect with the earphone (Enter “0000” if password is required.). Voice prompt “Connected” is given after connection is completed. Now you can make phone calls and listen to music via your mobile phone.

Auto-connection when starting up:

Long press the multifunction button for 3 seconds at off mode and release, then the earphone will search within its effective range for device previously paired and automatically connect with it.

Long press the button for 5 seconds.

Connection is completed.

Pairing with two mobile phones:

The earphone supports multipoint connection (one for two). You can pair with second mobile phone, connect with both phones at the same time, and answer calls from either one.

1. Turn off the earphone that is successfully paired with first mobile phone. Long press the multifunction button for 5 seconds at off mode.

2. The earphone will be turned on and start pairing again. Select “Macaw T1000” from Bluetooth device list on second mobile phone to connect with the earphone.

3. After the second mobile phone is successfully connected, select “Macaw T1000” from Bluetooth device list on first mobile phone that is already paired. Upon completion of connection, the earphone is connected with both mobile phones at the same time.

Earphone and mobile phone 1 are in connection mode.

Turn off the earphone and restart it. Activate the Bluetooth of mobile phone 2 to search.

Touch mobile phone 2 to connect with earphone.

Return to mobile phone 1 to touch for connection.

Talk Operation

Answer incoming call

— When there is a coming call, short press the multifunction button once to accept the call. (with voice prompt “call accepted”)

Reject incoming call

— When there is a coming call, long press the multifunction button for about 2 seconds to reject the call. (with voice prompt “call rejected”)

4. Information on warranty certificate does not conform to the product.
5. The product is damaged due to user's fault.

FCC Warning Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
